## **Opt-In Form for Electric Vehicle Charging Rate**

Please fill out this form if you are interested in enrolling in the Electric Vehicle Charging Rate (EVC Rate). The EVC Rate reduces the Retail Transmission Service Rates (RTSRs) for participating electric vehicle (EV) charging stations. The EVC Rate is intended for large charging stations with at least one Direct Current Fast Charger (DCFC), also referred to as a Level 3 charger. Personal chargers (e.g., attached to the side of a house) are not eligible.

Further information about the EVC Rate is available on our website: |

Electricity distributor should set up a webpage a	bout the EVC Rate based on copy to be provided by the OEBJ.
To receive the EVC Rate, eligible customers [Electricity distributor may insert instructions on harman mail].	s must opt in by completing this form. now to submit the form, e.g. by email, through the Distributor website, or by
EVC Rate on your next billing period or as so	unless we have any questions about it, we will begin applying the oon as possible after that. You will remain enrolled for as long as the irements listed below. You may opt out of the EVC Rate at any time

## **Customer Certification**

- 1. On behalf of the account holder, I would like to enrol the account in the EVC Rate.
- 2. I confirm that the EV charging station associated with the account meets each of the following eligibility criteria:
  - a. The charging station contains at least one DCFC stall (also referred to as a Level 3 charger).
  - b. At least 90% of the account's total monthly peak demand relates to EV charging (i.e., the DCFC and any lower level, non-DCFC chargers); auxiliary loads (e.g. for vending machines, tire inflation or restrooms) do not exceed 10% of the total monthly peak demand.
  - c. The account has a monthly peak demand that is equal to or greater than 50 kW but less than 5,000 kW.
  - d. The account has or is expected to have a 12-month average load factor equal to or less than 20%, calculated according to the following formula:

$$Load\ Factor\ _{month} = \frac{Electricity\ Consumed\ (kWh)_{month}}{Maximum\ Demand(kW)_{month} \times Number\ of\ Hours_{month}}$$

- e. The charging station does not primarily serve commercial and/or public sector fleets.
- f. The total DER nameplate capacity of any DER connected behind the account's meter does not exceed the total annual peak demand of the charging station.
